SUBJECT INDEX

° Indicates Abstract

A

Activation Analysis
For Mg, Mn, Zn, and Cu in blood, 223°
For trace metals in human serum, 223°
Activation analysis of biological materials, 222°
For trace elements, 225°
In medicine, 222°
Portable 14 mev neutron sources for, 224°
Use of computers in, 224°
Use of reactor for, 225°
Anemia of leukemia, 423
Angiographic evaluation of techniques and of aneurism with RISA, 232°
Antifibrin antibiodies, localization of in human tumors, 201°
Arsenic-74, 28
Arteriography, cerebral with x-rays and radioisotopes, 100
Autofluoroscope, clinical use, 202°

B

Blood
Anemia of leukemia, 423
Quantitation of loss, 282
Renal flow measurement, technique of, 480
Volume determination by whole body counting, 189°
Volume formulas, digital computer for, 94
Bone metastases by Sr^{85} scanning, 208°
Bone scanning, fluorine-18 for, 332
Brain
Arteriography with x-rays and radioisotopes, 100
Carotid and cerebral circulation, 335°
Cerebral circulation studies, 191°
Cerebral circulation time of, 399
Circulation time by external detection of isotope, 382
Brain tumor
Localization with neohydrin Hg^{203}, 83
Positron scanning for, 198°

C

Calcium-45, studies of single intravenous dose, 185°
Calcium-47
Bone metastases by scanning with, 454
In man, 184°
Turnover studies of, 186°
Cancer
Bone metastases detection with Co^{47} and Sr^{85}, 454
Large particle Yttrium-90 in advanced cancer, 229°
Carbon-14
Apparatus for CO_2 collection and scintillation Counting, 340°
Etryptamine metabolism, 203°
Glucose kinetics and antidiabetic agents, 206°
Progesterone assay by double isotope method, 205°
Chromic phosphate, P^{32} therapy in rat liver metastases, 193°
Chromic phosphate, P^{32} and nitrogen mustard simultaneously in peritoneum, 195°
Chromium-51
Agent for renogram, 273
Anemia of leukemia, 423
Collimation for in vivo organ counting, 339°
Flow rate measurement with, 186°
For spleen scanning, 201°
Hemoglobin survival in rats, 337°
Metabolic fate of rat erythrocytes, 206°
Quantitation of menstrual blood, 282
Circulation time of brain by external detection of isotope, 382
Circulation time of brain with RISA I^{131} or Neohydrin Hg^{203}, 399
Cobalt-57
In parathyroid, 160
Counting efficiencies compared to Co^{60}, 300
Porphinesulfate, synthesis and scanning for neoplasms, 249°
Cobalt-60, 184°
Counting efficiencies compared to Co^{57}, 300
Collimation for in vivo counts for Cr^{51} and Fe^{59} in organs, 339°
Collimator, calibration of slit type for scanning, 210°
Collimator, focusing, for research in scanning, 10
Colloidal Zirconyl Phosphate P^{32}, intravenous use, 196°
Computers
Digital for blood volume formulas, 94
Use in activation analysis, 224°
Copper-64, in scanning, 26
Copper determination in blood by activation analysis, 223°
Counters, multicrystal well, 128

E

Effusions, chylous, identification with iodinated fat, 188°
Erythrocytes
Kinetics in pulmonary emphysema, 110°
Incorporation in adenine nucleotides in schizophrenia, 226°

Iron labeled, passage into circulation, 188°
Metabolic fate in rat, 206°
Etryptamine, distribution excretion and metabolism of, 203°
External counting for flow measurements, 189°
Eyes—P^{32} test in ophthalmology, 228°

F

Family periodic paralysis—dilution studies of K^{42}, Na^{22}, and Tritium, 231°
Flow measurements by external counting, 189°
Fluorine-18 in bone scanning, 332

G

Glucose, kinetics and antidiabetic agents, 206°
Gold-198
Colloidal, 30
Colloid for hyatid cyst scanning of liver, 214°
Dose rates in vicinity of treated patients, 339°
Intercavitary therapy with, 323
Liver scintillography for diagnosis, 227°
Localization of hydatid cyst with, 315

H

Heart
Blood flow, EGG, and clinical diagnosis, 190°
Blood flow in dogs with I^{125} Hippurate, 338°
Coronary flow index, 189°
Coronary index, 190°
Intravenous Triolein I^{131} in normals and coronary disease, 213°
Isotope evaluation of mitral valve size, 305
Left-to-right shunt with methyl iodide I^{131}, 367
Plasma Triolein I^{131} capacity in arteriosclerotic disease, 212°
Proportional counter catheters for shunt diagnosis, 192°
Scanning for myocardial infarcts, 199°
Scanning with Rubidium-86, 76
Hippuran I^{131} in cerebral arteriography, 100
In radioisotope renogram, 67
Hospitals—preparation for industrial radiation accidents, 231°

I

Instrumentation
Calibration of thyroid uptake systems, 445
Efficiencies of Co^{57} and Co^{60} with several systems, 300
Insulin
Antigenicity, 205°
Glucose kinetics and effects of antidiabetic agents, 206°
Immuno—assay of, 407
Modified and crystalline in humans, 204°
International Atomic Energy Agency, 487
Interstitial radioactive palladium, 194°
Interstitial therapy—Iridium-192 removable implants, 255
Intestine function using radioactive nutrients after biopsy, 207°
Intraperitoneal nitrogen mustard and colloidal P^{32} simultaneously in rats, 195°
Iodinated fat for identification of chylous effusion, 188°
Iodine-123, properties of, 183°
Iodine-125
Agent for renogram, 273
Clinical applications of, 337°
Clinical uses of, 183°
Hippurate for coronary blood flow in dogs, 338°
Simultaneous Triolein I^{131} and oleic acid absorption studies, 213°
Iodine-131, 180, 181, 187, 188°
Agent for renogram, 273
Albumin for placentography, 215°
Albumin in evaluation of angiography and aneurisms, 232°
Albumin in mitral valve size, 305
Albumin, stability studies of, 268°
Antifibrin antibodies, location in human tumors, 201°
Blood complications after cancer therapy, 211°
Cerebral arteriography with, 100
Diodrast, 30
Flow rate measurement with, 186°
Hamolsky RBC-T-3 test vs Sephadex test, 417
Hippuran for cerebral circulation time, 382
Hippuran for renal blood flow, 480
Immuno-assay of insulin I^{131}, 407
Insulin in antiginicity, 205°
Intravenous triolein in normals and coronary disease, 213°
Iodipamide, 63
Iodipamide in liver in Gilberts disease, 336°
Methyl iodide for left-to-right shunt, 367
Modifled and crystalline insulin, 204°
Placental transmission of thyroxine compounds, 180°
Plasma binding, 41
Plasma triolein in vitro in arteriosclerotic heart disease, 218°
PVP in liver in hypoalbuminaemia, 217°
Renogram, 67
Renogram in hypertension, 218°
RISA for cerebral circulation time, 399
Simultaneous triolein I^{131} and oleic acid I^{125} absorption studies, 213°
Specific emotional stress in hyperthyroids, 228°
T3 and T4 binding to glass and electrophoretic filter paper, 229°
Thyroid, 157
Thyroid function tests with, 182°
Thyroxin in liver test, 203°
Triiodothyronine red cell test, 216°
Triiodothyronine-resin binding, 229°
Venous flow, 136
Iodine-132
Evaluation of Te^{132} generator, 352
Study of thyroid function after I^{131} therapy, 436
Iodipamide-I^{131}, inadequacy for liver function, 63
Iridium-192 removable implants, 255
Iron-59, 188°
Absorption of ferrous sulfate, 227°
Anemia of leukemia, 423
Collimation for in vivo organ counting, 339°
Distribution of oral dicyclopentadienyliron in rat, 336°
Kinetics of, 110
Turnover studies for, 186°
Iron kinetics in pulmonary emphysema, 110

J

Jaundice, rose bengal in, 181°

K

Kidney
Blood flow measurement, techniques of, 480
Clinical studies with hippuran renogram, 220°
Hippuran renogram in 250 cases, 220°
Interpretation of scans, 199°
Labeled Hippurate, studies on decomposition in dogs, 207°
Radio hippuran renogram, technical considerations, 218°
Radiohippuran renogram with magnetic tape recording and computer analysis, 219°
Renocystogram interpretations, 221°
Renocystogram and intravenous pyelograms, 221°
Renogram in renal shutdown after vascular surgery, 217°
Renogram in hypertension, 218°

Renogram in renovascular hypertension, 222°
Standardization of isotope renogram, 221°
Stop flow scans, 200°
Krypton 85, lung pulmonary function studies with, 191°
Uses of, 230°

L

Leukemia, anemia of, 423
Liver
Chromic phosphate (P^{32}) therapy in rat metastases, 193°
Effect of injury on metabolism of sulfated serum proteins, 335°
Function, inadequacy of iodipamide I^{131} for, 63
Hydatid cysts, localization with Gold-198, 315
Hydatid cysts scanned with Au-198, 214°
Metastases in relation to scanning, 149
PVP labelled uptake in hypoalbuminaemia, 217°
Rose Bengal in jaundice of, 181
Rose Bengal uptake in gastrointestinal bleeding, 181°
Scintillography coefficients for diagnosis of, 227°
Thyroxin metabolism as clinical test, 203°
Uptake defect of I^{131} iodipamide in Gilberts disease, 336°
Y^{90} microspheres in irradiation of, 194
Lower extremities, evaluation of disease by isotope studies, 136
Lung
Cancer treated with large particle Y^{90}, 336°
Pulmonary function studies with KR^{85}, 191°
Radiation effect on fibrinolytic system of dog, 341
Radiopulmonography for individual lung function, 191°
Radiotherapy of malignant diseases, 339°
Removal of labeled particulates from, 187°

M

Magnesium determination in blood by activation analysis, 223°
Mercaptopurine, alkylated, fate in rat, 203°
Mercury-203
Scanning, 200°
Neohydrin biological fate in dogs and humans, 208°
Neohydrin for cerebral circulation time, 399
Scanning for myocardial infarcts, 199°
Brain tumor localization with, 83
Interpretation of renal scans, 199°
Microspheres, interstitial use, 335°
Organ irradiation by, 195°
Y^{90} in liver irradiation, 194°
Multicrystal well counters, 128
Mycosis fungoides—therapy with Sulfur-35, 230°
Myelography in infants, 288°

N

Neohydrin-Hg, 203
Brain tumor localization with, 83
Biological fate in dogs and humans, 208°
Neutron capture therapy in mouse-tumors, 197°
Neutron activation analysis—see activation analysis

P

Palladium-103 and palladium-109 interstitial irradiation, 194°
Pancreas, experimental scintillating scanning of, 47
Pancreas, Se^{75}-selenomethionine for visualization, 202°
Parathyroid, radiocyanocobalamine Co^{57} concentration in, 160
Phosphorus-32
Colloidal zirconyl phosphate intravenous, 196°
Erythrocyte kinetics, 110
In ophthalmology, 228°
P^{32} and nitrogen mustard simultaneously in peritoneum, 195°
Therapy in rat liver metastases, 193°
Placentography, 215°
Placenta, transmission of thyroxin compounds, 180°
Plasma and red cell flow rates in hypertensive dogs, 186°
Plasma, effect of stressed plasma on I^{131} uptake of chick embryos, 212°
Plasma—thyrobinding by—a test of thyroid function, 41
Polycythemia therapy with radioyttrium (Y^{90}), 18
Positron detectors—feasibility studies, 233°
Potassium-42 in familial periodic paralysis, 231°
Progesterone assay by double isotope method, 205°
Proportional counter catheters for intracardiac shunt diagnosis, 192°
Protein-sulfated serum, effect of liver injury on metabolism, 335°
Pulmonary function studies with Kr^{85}, 191°
Pulmonary emphysema, erythrocyte and iron kinetics in, 110
Pyrimidines, halogenated, incorporation in neoplastic tissue, 187°

R

Radiation
Gamma, effect on fibrinolytic system of lung, 341
Hazards of, 1
Radiation accidents, industrial, hospital programs for, 231°
Radiation protection, physical (grid) and chemical against lethality, 472
Radiobiology—protection against lethality by chemical and partial body shielding, 472
Radiocyanocobalamine concentration in parathyroid, 160
Radioisotopes
Disposable equipment for therapy, 153
Renogram, 67
Radiopulmonography for individual lung function, 191°
Radioyttrium therapy of polycythemia vera with, 18
Reactor for activation analysis, 225°
Medical, quality and field size, control of, 360
Neutron capture therapy in mouse tumors, 197°
Red cell and plasma flow rates in hypertensive dogs, 186°
Renogram
New agents for. RISA-I^{131}, EDTA-Cr^{51}, Hippuran-I-125, 273
Radioisotope, 67
See under kidney
Reticuloenodothelial system—function in man and animals, 214°
Function studies with tracers, 214°
Rose Bengal in jaundice, 181°
Rose Bengal liver uptake in gastrointestinal bleeding, 181°
Rubidium-86, myocardial scanning with, 76

S

Salivary protein bound iodine, 157
Scanning
Body section radioisotope, 199°
Brain tumors with Neohydrin Hg^{203}, 83
Detection of bone metastases with Ca^{47} and Sr^{85}, 454
Fluorine-18 for bone, 332
Focusing collimator for research in, 10
For myocardial infarcts, 199°
Hydatid cysts of liver located with Au-198, 214°
Hydatid liver cysts, 315
Liver scintillography for diagnosis, 227°
Magnetic tape recording, 208°
Myocardial with Rubidium-86, 76

Of neoplasms with Co^{57} tetraphenylorphinesulfonate, 249
Of pancreas with Se^{75}, 202*
Of spleen, 201*
ORINS linear scanner in clinical diagnosis, 26
Photocopying for accentuating small differences in optical density, 51
Photocopying for erasing background of photoscans, 51
Positron for brain tumors, 198*
Renal, 200*
Renal interpretation, 199*
Renal stop flow, 200*
Scintillation of pancreas, experimental, 47
Size of liver metastases in relation to, 149
Slit collimator calibration, 210*
Small animal linear type, 337*
Strontium 85 for bone metastases, 208*
Use of models in photoscanning, 209*
Seaborg G. T., biography, 246
Selenium 75-Se^{75}-methionine for pancreas scanning, 202*
Sodium-22 in familial periodic paralysis, 231*
Sodium-22—in sweat, 185*
Sodium-24, 35
Spleen, radioisotope scanning, 201*
Steatthorea-simultaneous triolein I-131 and oleic acid absorption studies, 213*
Stomach, secretion of treated fluorene compounds, 339*
Strontium-85—bone metastases by scanning, 208, 454*
Strontium-90, late effects on mice, 293
Strontium turnover, long term component in man, 226*
Sulphur-35
Effect of hepatic injury on protein metabolism, 335*
Therapy of mycosis fungoids, 230*
Mercatopurine in rats, 203*
Sweat, sodium-22 in, 185*

T

Technetium 90, as biological tracer, 209*
Tellurium-132—evaluation of I^{132} generator, 352
Tetracycline-N(4-iodo-pyrazole-methyl) localization in animal tumors, 210*
Therapy
Colloidal zirconyl phosphate intravenous, 196*
Disposable equipment for radioisotopes in, 153
Intracavitary with Gold-198, 323
Interstitial use of radiating microspheres, 335*
Interstitial with removable Iridium-192, 255
Interstitial with Y^{90}, 193*
Large particle Yttrium-90 in advanced cancer, 229*
Of mycosis fungoids with Sulphur-35, 230*
Organ irradiation by microspheres, 195*
Polycythemia vera with radioyttrium (Y^{90}), 18
Radiation, quality and field size of medical reactor, 360
Thymidine, tritiated in cancer, 206*
Thyroid
Calibration of uptake systems for, 445
Cancer after childhood radiation, 193*
Cancer, blood complications after I^{131} therapy, 211*
Cancer, correlation of preoperative scans and surgical specimens, 208*
Effects of drugs on T3 uptakes by erythrocytes, 228*
Function, multiple tests evaluated, 182*
Function, simple measure of thyro-binding by plasma, 41
Function with resin T-3, 180*
Function with I^{132} after I^{131} therapy, 436
Hamolsky RBC-T-3 test vs Sephadex test, 417
Hormone, test for metabolic effect of, 215*
Newborn function studies, 211*
Red cell triiodothyronine test, 216*
Salivary protein bound iodine, 157
Specific emotional stress in hyperthyroids, 228*
Standardization of TSH test, 338*
T-3 uptake by red cells, 309
Technical problems of T-3 binding of red cells and resins, 232*
Triiodothyronine-resin binding, 229*
Thyrotopin, standardization of TSH test, 338*
Thyroxin
As liver test, 203*
Placental transmission of, 180*
Tritium
Gastric secretion of labeled fluorine compounds, 339*
In familial periodic paralysis, 231*
Progesterone assay by double isotope method, 205
Thymidine in cancer, 206*

V

Venous diseases of lower extremities, isotope studies of, 136
Vitamin B-12 borderline values, 184*
Radiocyanocobalamine in parathyroids, 160

W

Whole body counter in turnover studies of, 186*
Whole body counting for blood volume, 189*
Whole body radiation, hematological and blood response in, 198*

Y

Yttrium-90
Interstitial therapy with, 193*
Large particles for lung cancer, 336*
Large particles in advanced cancer, 229*
Microspheres in liver irradiation, 194*
Therapy with, 18

Z

Zinc-65, 47
Zinc determination in blood by activation analysis, 223*
